Executive summary

A technical and on-page audit of **https://kovik.online**, covering 8 crawled pages. Every finding below was measured, not assumed — each check records what was found on the page and what to change.

84 / 100

Good, with gaps
Overall visibility score

6 issues found
3 blocking, 3 to improve

Fix these first

#	Issue	Why it matters	Severity
1	**HTTPS on every page** 8 of 8 pages are served over plain HTTP.	Serve the whole site over HTTPS and 301-redirect http:// to https://.	CRITICAL
2	**XML sitemap present** No usable sitemap.xml was found.	Publish an XML sitemap, list every indexable page, and submit it in Search Console.	HIGH
3	**Text compression enabled** 0 of 8 pages were served compressed.	Enable gzip or brotli on the server — it usually halves transfer size.	MEDIUM
4	**Title tags present and well sized** 0 pages without a title, 0 too short, 6 too long.	Write a unique 30–60 character title per page: service + city + brand.	CRITICAL
5	**Meta descriptions written** 0 pages without one, 0 too short, 2 too long.	Write a 120–160 character description that gives a reason to click.	HIGH

Findings in detail

Grouped by severity. Each row states what was measured, on how many pages, and what to do about it.

3 checks failed and **3 need improvement**. Critical items cost you rankings or trust today; high items cost you clicks; medium and low items are the difference between ranking and ranking well.

CRITICAL — 2 issues

CRITICAL · Technical

HTTPS on every page

8 of 8 pages are served over plain HTTP.

Affected: https://kovik.online/; https://kovik.online/solutions.html; https://kovik.online/services.html; https://kovik.online/intelligence.html and 4 more

WHAT TO DO

Serve the whole site over HTTPS and 301-redirect http:// to https://.

CRITICAL · On-page

Title tags present and well sized

0 pages without a title, 0 too short, 6 too long.

Affected: 127.0.0.1:8801/solutions.html; 127.0.0.1:8801/services.html; 127.0.0.1:8801/intelligence.html; 127.0.0.1:8801/about.html and 2 more

WHAT TO DO

Write a unique 30–60 character title per page: service + city + brand.

HIGH — 2 issues

HIGH · Technical

XML sitemap present

No usable sitemap.xml was found.

Affected: https://kovik.online/sitemap.xml

WHAT TO DO

Publish an XML sitemap, list every indexable page, and submit it in Search Console.

HIGH · On-page

Meta descriptions written

0 pages without one, 0 too short, 2 too long.

Affected: 127.0.0.1:8801/about.html; 127.0.0.1:8801/blog.html

WHAT TO DO

Write a 120–160 character description that gives a reason to click.

MEDIUM — 1 issue

MEDIUM · Performance

Text compression enabled

0 of 8 pages were served compressed.

WHAT TO DO

Enable gzip or brotli on the server — it usually halves transfer size.

LOW — 1 issue

LOW · Performance

Cache headers set

0 of 8 pages send a Cache-Control header.

WHAT TO DO

Set long cache lifetimes on assets and a short one on HTML.

Page-by-page

Measured per page. A page score below 70 has more than two structural problems.

URL	Status	Score	Title	Desc	H1	Words	Alt gaps	ms	KB
https://kovik.online/	200	**100**	60	156	1	1466	0	10	28
https://kovik.online/solutions.html	200	**86**	71	161	1	1254	0	5	21
https://kovik.online/services.html	200	**86**	67	155	1	1255	0	3	32
https://kovik.online/intelligence.html	200	**86**	71	155	1	1139	0	4	22
https://kovik.online/about.html	200	**86**	64	169	1	863	0	3	19
https://kovik.online/blog.html	200	**100**	61	171	1	446	0	6	18
https://kovik.online/book-demo.html	200	**86**	71	152	1	500	0	6	16
https://kovik.online/contact.html	200	**86**	69	152	1	363	0	4	15

KOVIK DIGITAL SOLUTIONS
POWERED BY KOVIK INTELLIGENCE AI

Method and limits

The engine fetched 8 pages from https://kovik.online (same host only, robots.txt respected, 2 levels deep), parsed the HTML, and ran 26 checks. Response times are a single measurement from one location at one moment — treat them as a signal, not a benchmark.

What this audit does not cover: backlinks and authority, search volume and keyword difficulty, competitor rankings, Core Web Vitals field data from real users, paid search, or Google Business Profile performance. Those need Search Console, Analytics and a rank-tracking source.

Scores are a weighted average: Technical 30%, On-page 25%, Content 20%, Structured data 15%, Performance 10%. A pass scores 1, an improvement 0.5, a failure 0.
